Changes to the Allocation of Funding for School Student Governments (2008-2009)

The allocation of funding for school-specific student governments has change for FY2009 to reflect the changes in the way that the University assesses the General Fee. Beginning in September 2008, dissertating students, as a group, will be contributing more General Fee than they have in the past; however, overall the change is revenue neutral across the University. In order to maintain equitable distribution of student government funds, reflecting the paying contributions of students enrolled in each school, GAPSA has therefore adjusted the school government allocations to account for the increase in the General Fee contributions of dissertating students. As a result, schools with large percentages of dissertating students will see an increase in their student government funding, while schools that have small percentages of dissertating students will see a decrease in available funds, coinciding with the decrease in the General Fee for their students.

Appointment of Representatives to University-Wide Committees (2008-2009)

Every year new and returning graduate and professional students have the opportunity to become actively involved in shaping and improving education and student life at Penn by representing student concerns and ideas on University-wide committees. For the 2008-2009 academic year, GAPSA has appointed a vibrant and diverse group of about 100 students, hailing from all 12 of graduate and professional schools, to about 38 different committees, councils and advisory boards including two new ones: the Penn InTouch Refresh Student Advisory Board and the Counselling and Psychological Services Advisory Board.

Newly Updated Website (2008-2009)
